P2-S480000-E-LV

19" 2U fiber optic distribution panel, 48x SC simplex/LC duplex, slide version, empty

The panel is made of metal. At the rear, it features 4 to 8 openings for PG cable glands. Two locking elements located on the front of the panel prevent accidental sliding out. Each port for fiber optic adapters is sequentially numbered for easy identification.
The drawer includes embossed holders for organizing fibers using standard cable ties. Additional components are provided to secure the main cable, preventing it from being accidentally pulled out.
The drawer is mounted on slide rails, allowing it to extend beyond the panel, which provides convenient access to the PG ports located at the rear.

Technical specifications

19" 2U fiber optic distribution panel, 48x SC simplex/LC duplex, slide version, empty

Height	2U
Front version	48 x SC simplex/LC duplex
Number of adapters (max)	48
Color	anthracite (RAL 7016)
Dimensions	2U / 19" / 255 mm (depth)
Material	metal

High capacity and versatility

The panel design allows for installation of up to 96 fibers and supports various cable types, including central tube and loose tube constructions. The panel is compatible with SC simplex and LC duplex adapters, ensuring versatile applications.

Robust construction and protection

The panel is made of metal and finished in anthracite (RAL 7016), ensuring durability and a clean, professional appearance. Front-mounted locking elements prevent accidental sliding out, while integrated fiber management holders allow cables to be neatly organized using standard cable ties.
