

CCAS-CB6-UTP

Category 6 UTP Junction Box

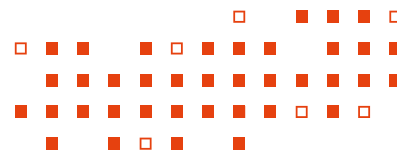

The Category 6 UTP junction box is a network cable coupler that provides a reliable connection in network infrastructure. It is ideal for applications in offices, homes, and other locations requiring stable network connections. The coupler is characterized by ease of installation and compatibility with various types of Category 6 and lower network cables.

Available variants

Category 6 UTP Junction Box

Parameter	Value
Category	6
Shielding	UTP (unshielded)
Operating temperature	-10°C to 60°C
Connector type I	LSA
Connector type II	LSA
Material	plastic
Color	white
Dimension (HxWxL)	30x25x65 [mm]

Category 6 UTP

This connector is designed to work with Category 6 UTP (Unshielded Twisted Pair) cables, which guarantees excellent data throughput and minimal signal loss. It is ideal for transmitting data, voice, and video signals in gigabit networks.
