

CCAS-K5E-UTP

RJ45 keystone module category 5e UTP

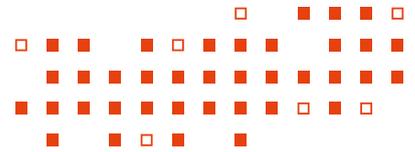

The securityNET Category 5e UTP (Unshielded) keystone is designed for indoor applications. It is used for terminating installation cables in wall outlets and blank patch panels. It is a compatible part of the “keystone” mounting system, therefore it can be used with many outlets from various manufacturers. This product meets the requirements specified by structured cabling standards such as: ISO/IEC 11801, EN 50173, TIA/EIA 568-C.2.

Technical specifications

RJ45 keystone module category 5e UTP

Category	5e
Unshielded	no
Mounting version	tool
Mounting type	Keystone
AWG range	24-26 AWG
Housing body material	ABS + PC
Connector	Rj-45
RJ45 contact material	phosphor bronze with nickel
Contact areal	gold plated
PoE standard	PoE/PoE+ (IEEE 802.3af, 3at)

Category 5e compatible, versatile option

Category 5e UTP keystone is one of the most popular LAN components for terminating cable connections. This category of 5e UTP is the most common choice in the market for smaller building installations due to its standardized design that provides convenience of use.

Tool termination system, classic simplicity

securityNET tool-based keystone modules require the use of specialized LSA punch-down tools (Krone blade). However, the classic two-piece design (keystone + base) ensures easy installation.
