

CCAS-PA6-24UTP

Category 6 19-inch 1U 24xRJ45 UTP Patch Panel black with cable-mounting bracket

The securityNET Category 6 UTP (Unshielded) Patch Panel is designed for installing twisted-pair cable terminations in a 19-inch telecommunications rack. It is ideal for installations in computer networks, telephone systems, CCTV systems, etc., that are not exposed to electromagnetic interference. The panel meets the requirements of structured cabling standards: ISO/IEC 11801, EN 50173, EIA/TIA 568-B.2.

Technical specifications

Category 6 19-inch 1U 24xRJ45 UTP Patch Panel black with cable-mounting bracket

Number of ports	24 x RJ45
Category	6
Shielding type	UTP
Height	1U
Color	RAL 9005
Material	steel sheet
Shelf	not
Rear	LSA terminals

Universal design compliant with standards

The Category 6 UTP patch panel is a fundamental component of an advanced LAN for terminating cable connections. Choosing Category 6 UTP provides us with greater capabilities, as it can support 10 Gbps transmission. The panel's construction is standardized and user-friendly.

High quality workmanship with the user in mind

SecurityNET panels are designed and manufactured so that the installer has confidence in the performance of the installed LAN components. In caring for the solutions provided, the panels undergo a series of quality checks at the manufacturing facility.
