

CCAS-K6-STP

## RJ45 keystone module category 6 STP (toolless)

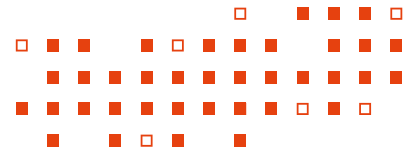

The Category 6 STP (shielded) keystone module from securityNET is designed for indoor applications. It is used at the termination of the installation cable in jacks and hollow panels. It is a compatible part of the keystone module mounting system, so it can be used with many outlets from different manufacturers. This product meets the requirements set by such structured cabling standards as ISO/IEC 11801, EN 50173, TIA/EIA 568-C.2.

## Technical specifications

RJ45 keystone module  
category 6 STP (toolless)

Category	6
Unshielded	yes
Mounting version	Toolless
Mounting type	keystone
AWG range	22-26 AWG
Housing body material	zinc alloy
Connector	RJ-45
RJ45 contact material	phosphor bronze with nickel
Contact areal	gold plated
PoE standard	PoE/PoE+/4PPoE (IEEE 802.3af, 3at, 3bt)

**Guaranteed network security in all conditions.**

The STP (shielded) version of the keystone is made of a high-quality, durable zinc alloy, allowing it to be used even in environments exposed to electromagnetic interference. As a result, you can be confident that the installation built with it will provide a stable connection even in such demanding conditions.

**Toolless termination for greater convenience.**

Terminating the cable conductors does not require an LSA punch-down tool (Krone tool), which shortens installation time. The module's design allows it to be easily assembled by hand, making installation simple and convenient.
