

CCAS-K6-UTP-TL

RJ45 Keystone Cat6 UTP (tool-less)

The Cat6 UTP (unshielded) tool-less keystone from securityNET is designed for indoor applications. Its construction allows the cable to be terminated without the use of an LSA punch-down tool. It is used to terminate installation cables in wall outlets and empty patch panels.

The keystone is compatible with the keystone mounting system, which allows it to be used with many sockets from different manufacturers.

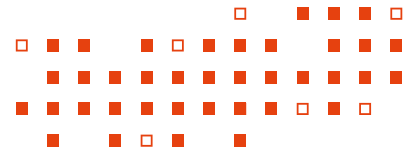

This product meets the requirements defined by structured cabling standards such as ISO/IEC 11801, EN 50173, and TIA/EIA 568-C.2.

Technical specifications

RJ45 Keystone
Cat6 UTP (tool-less)

Category	6
Unshielded	not
Mounting version	Toolless
Mounting type	keystone
AWG range	24-26 AWG
Housing body material	ABS + PC
Connector	Rj-45
RJ45 contact material	phosphor bronze with nickel
Contact areal	gold plated
PoE standard	PoE/PoE+/4PPoE (IEEE 802.3af, 3at, 3bt)

Category 6 compliant, ready for higher data transfer speeds

The Cat6 UTP keystone is a key component of an advanced LAN network used for terminating cable connections. Choosing Cat6 UTP provides greater capabilities, as it can support data transmission speeds of up to 10 Gb/s. Its standardized design ensures convenient installation and use.

Toolless termination for greater convenience.

Wire termination does not require the use of an LSA punch-down tool (Krone tool), which reduces installation time. The module's design allows it to be easily assembled by hand, making installation convenient.
