MOSAIC, or one standard

The MOSAIC standard is a standardized size of 2×2 inches, or approximately 25×25 mm. Surfacemounted or concealed elements included in the socalled 'white assembly', such as LAN, electrical, and multimedia elements like electrical sockets, telecommunications adapters, or multimedia modules, are made in this standard. This standardized size ensures that the adapter will fit most supports mounted in frames as well as in trunking in surface installations.
