

CCAS-K6A-STP

## Keystone RJ45 cat 6A STP (toolless)

securityNET cat 6A STP (shielded) toolless keystone is designed for indoor applications. Its design allows cable termination without the use of an LSA punch-down tool. It is used to terminate installation cables in outlet sockets and empty patch panels.

It is a compatible component of the “keystone” mounting system, which allows it to be used with many outlets from different manufacturers.

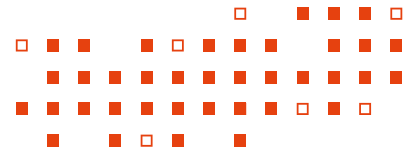

The product meets the requirements of structured cabling standards such as ISO/IEC 11801, EN 50173, and TIA/EIA 568-C.2.

## Technical specifications

Keystone RJ45  
cat 6A STP (toolless)

Category	6A
Unshielded	yes
Mounting version	Toolless
Mounting type	keystone
AWG range	22-24
Housing body material	zinc alloy
Connector	RJ-45
RJ45 contact material	phosphor bronze with nickel
Contact areal	gold plated
PoE standard	PoE/PoE+/4PPoE (IEEE 802.3af, 3at, 3bt)

**Guaranteed network security in all conditions.**

The STP (shielded) version of the keystone is made of a high-quality, durable zinc alloy, allowing it to be used even in environments exposed to electromagnetic interference. As a result, you can be confident that the installation built with it will provide a stable connection even in such demanding conditions.

**Toolless termination for greater convenience.**

Terminating the cable conductors does not require an LSA punch-down tool (Krone tool), which shortens installation time. The module's design allows it to be easily assembled by hand, making installation simple and convenient.
